

# Task 01

## General Instructions:

- Code should be neat and commented where necessary.
- Use of **AI TOOLS** is highly prohibited. If detected, you will be charged with penalties.
- Use Search Engines to find solutions to your problems.

## Problem Statement:

You should clone the design of the website given below. You may change the colors as you wish and choose images you like. Use of SVG is highly appreciated over use of images.

The task can be completed with only HTML and CSS but you may use JS if you find it necessary.

## Optional Instructions:

You may add state management for the inputs and store them in an array.

## Deadline:

Given task shall be submitted before 2<sup>nd</sup> April (24:00)

## Submission Instructions:

You can join the GitHub assignment from [this](https://classroom.github.com/a/DoGcnXcd) link (https://classroom.github.com/a/DoGcnXcd). In case you cannot join, kindly DM me your GitHub profile link at +923334574770. You will submit the code in your assigned repository.

## Legends for Diagram:

1. You may use an image of your choice.
2. Choose any icon library of your choice for these icons.
3. Use of SVG is preferred over PNG/JPEG.
